DETAILED ACTION

Claims 44-75 are currently pending.

Application Status

In response to a previous Office action, a non-final action (mailed on February 05, 2008), Applicants filed a response and amendment received on 12/17/2008 and 8/5/2008, amending claim 44 is acknowledged. Claim 75 is drawn to a method of use of modified galactanase, which is regarded as new Group III and a non-elected invention but would be rejoined if the elected Group I is allowable.

Therefore, the elected group comprises claims 44-74, which are under consideration and are present for examination.

The abstract has been rewritten on a separate sheet attached herewith as required by 37 CFR 1.72 (b).

Election/Restriction

Claims 44-74 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(b), claim 75 is directed to the process of using the allowable product, previously withdrawn from consideration as a result of a restriction requirement for claim 75 proposed in the current office action is hereby rejoined and fully examined for patentability under 37 CFR 1.104. Claims 22-26 directed to the invention(s) II not requiring all the limitations of the allowable product claim, have NOT been rejoined.

However, Claim 75 is directed to method of using the novel product and thus rejoined with the allowed product, which is fully examined for patentability under 37 CFR

1.104. The Election/Restriction requirement between polypeptide of Group I and process of use of allowable product of Group III is now vacated.

Because a claimed invention of Group III withdrawn from consideration under 37 CFR 1.142 has been rejoined, **the restriction requirement of Groups I (claims 1-2, 6, 10, 14 and 18-21, now new claims 44-74) and III (claim 75) as set forth in the Office action mailed on 10/31/2007 and current office action is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Elias Lambiris, applicants' representative on December 23, 2008, and January 9, 2009.

Amendment to the Specification:

Specification, at page 2, line 6-7, replace "Fig. 6 shows the alignment of Fig. 5 with three additional galactanase sequences added" with "Fig. 6 shows the alignment of Fig. 5 with three additional galactanase sequences added (SEQ ID NO: 7-9)".

Amend claims as shown below:

- Claim 44 A variant of a parent Glycoside Hydrolase Family 53 galactanase, comprising an alteration in at least one of the following positions:
- 90, 91, 181, 303, 305, and 313,
- wherein
- (a) the parent Glycoside Hydrolase Family 53 galactanase comprises an amino acid sequence which is at least 80% identical to SEQ ID NO: 1;
- (b) the variant comprises an amino acid sequence which is at least 80% identical and ~~less than 100% identical~~ to SEQ ID NO: 1; wherein the variant is not SEQ ID NO: 1;
- (c) each position is the number of the corresponding amino acid residue in SEQ ID NO: 1;
- (d) the alteration(s) are independently
- (i) an insertion of an amino acid immediately downstream of the position,
- (ii) a deletion of the amino acid which occupies the position, and/or

- (iii) a substitution of the amino acid which occupies the position with a different amino acid; and
- (e) the variant has galactanase activity.

Allowable Subject

Claims 44-75 are allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The applicant has claimed a variant of a parent Glycoside Hydrolase Family 53 galactanase, comprising an alteration in at least one of the following positions: 90, 91, 181, 303, 305, and 313, wherein (a) the parent Glycoside Hydrolase Family 53 galactanase comprises an amino acid sequence which is at least 80% identical to SEQ ID NO: 1; (b) the variant comprises an amino acid sequence which is at least 80% identical to SEQ ID NO: 1, wherein the variant is not SEQ ID NO: 1; (c) each position is the number of the corresponding amino acid residue in SEQ ID NO: 1; (d) the alteration(s) are independently (i) an insertion of an amino acid immediately downstream of the position, (ii) a deletion of the amino acid which occupies the position, and/or (iii) a substitution of the amino acid which occupies the position with a different amino acid; and (e) the variant has galactanase activity and method of use thereof. The Examiner has rejoined claim 75, drawn to a method of using said galactanase variant polypeptide. The prior art does not teach a variant galactanase protein having galactanase activity. The claimed invention is novel and nonobvious over the prior art.

Art Unit: 1652

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
